

JEREMIAH BUTLER

Easton, MA 02356
(774) 329-5096 - hello@jbutler.dev

OBJECTIVE

Problem Solver, Leader, and Software Engineer with well rounded experience. Well versed in cloud native technologies and looking to make an impact on a global scale.

EDUCATION

Georgia Institute of Technology MS in Computer Science Machine Learning Specialization	<i>2018 - 2021</i>
University of Massachusetts Dartmouth BS in Computer Science	<i>2010 - 2014</i>

WORK EXPERIENCE

Shopify <i>Senior Software Developer</i>	Remote <i>January 2024 - Present</i>
--	---

- Working on the Selling Strategies team building Shopify's subscription commerce features
- Manage the subscriptions and pre-orders APIs that power merchant subscription and pre-order flows
- Maintain the first-party (1P) subscriptions application
- Drive production rollouts and A/B testing of subscription features

IBM <i>Senior Software Engineer</i>	Cambridge, Massachusetts <i>April 2022 - January 2024</i>
---	--

- Developed New Hybrid Cloud Monitoring Solution for IBM SevOne Network Performance Management Platform (AWS, Azure, GCP). Led to immediate acquisition of a new customer
- Published a generalized ETL collection framework for use by multiple solution teams
- Led twice weekly code kata exercises to foster team growth and collaboration
- Team served as model for migration to agile and devops

General Dynamics Mission Systems <i>Advanced Software Engineer / Software Lead</i>	Taunton, Massachusetts <i>July 2015 - March 2022</i>
--	---

- Graduate of Engineering Leadership Program
- Architect large scale project targeting the use of cloud technologies for DoD customers
- Lead multiple teams through successful test events and contract awards totalling over 30 million dollars
- Proposed and lead internal research project to bring Machine Learning Technologies to the Tactical Edge. Work was later used on at least 2 further projects
- Created an innersource community that has over 100 projects available for reuse
- Presented innersource concept to over 130 participants including international branches
- Mentored junior engineers through 1 on 1 sessions as well as code kata exercises

Ichabod Crane School District <i>Network Engineer</i>	Valatie, New York <i>May 2014 - July 2015</i>
---	--

- Moved multiple physical servers to virtual environment
- Migrated on-prem email and document storage to Google Apps for education

- Management of user workstations and servers
